INSTRUCTIONS »PRESTIGE«

ATTENTION: Please read these operating instructions carefully before using the electronic lock or setting a new number combination. We assume no liability for any malfunction caused by faulty changeover ,use of force or improper handling nor in case of material or pecuniary damage, damage due to improper closing of the safe.

Your safe "Prestige" can be opened with a master code, a guest code or with one of the two emergency opening keys provided.
Each time you press a key is acknowledged with an acoustic signal.
Each key pressing can be corrected by pressing the "*" key.
If you don`t want the entered code to be shown (the master or the guest code) when entering the code press "*" before entering it. Instead of the entered number it will be displayed "-".
It is not recommended to use non-alkaline batteries.

**The safe is shipped from the factory with the master code 0-0-0-0-0-0
and the
guest code 1-6-8-0.**
For security reasons, we recommend that you immediately change the master code and user code to a personal code.

1. GETTING STARTED:

a. Remove the round cover of the emergency opening lock that is located on the right part of the keyboard.
b. Insert one of the two supplied emergency opening keys into the lock.
c. Turn the key to the right.
d. Open the door.
e. Turn the key back to its original position and remove it.
f. Remove the securing screw from the battery compartment cover from inside of the door.
g. Slide the battery compartment cover down.
h. Insert four 1.5 volt AA alkaline batteries (pay attention to the correct polarity when inserting the batteries).
i. The display shows "HELLO" - the safe is now ready to use.
j. Close the battery compartment.

2. MISSING INPUT

If you ever enter the wrong code and press the "#" key, a five-time acoustic signal appears and the message "ERROR-1" is written on the display. If you make another incorrect entry, "ERROR-2" is written on the display and also "ERROR-3" after three incorrect entries.

3. LOCK TIME AFTER AN INCORRECT ENTRY

If an incorrect code has been entered for three times, a five minute lock period will commence, during this period of five minutes no entry is possible. If a key is pressed during the lock period,it appears "HOLd05" written on the display and the remaining lock time is counted down until it expires. This lock time can not be *ed, even if you remove the the batteries.

4. BATTERY CHANGE

(If the display becomes weak, the writting is unreadable, or if the opening is no longer possible, you should immediately replace the batteries).
a. If necessary, open the safe with the emergency opening key (see point 9 - opening with emergency opening key).
b. Remove the securing screw from the battery compartment cover from the inside of the door.
c. Slide the battery compartment cover down.
d. Remove the old batteries.
e. Insert new batteries (alkaline) – pay attention to the correct polarity.
f. Close the battery compartment.

ATTENTION after a battery change, the stored codes (master code, guest code) will remain in the system/will be momorized.

5. CHANGING THE MASTER CODE

(The master code you have chosen will remain set /will be momorized in the system after a battery change)
